All investment fund returns are calculated for a class. Individual investor returns may differ as a result of fees, actual date(s) of investment, date(s) of reinvestment of income and withholding tax. All investment fund returns shown are after the deduction of the total investment charges (TIC) but exclude any initial or ongoing advisory fees that may, if applicable, be charged separately. Annualised returns, also known as compound annualised growth rates, are calculated from cumulative returns and provide an indication of the average annual return achieved from an investment that was held for the stated period. Actual annual figures are available from Curate or the management company on request. All investment fund returns figures quoted (tables and charts where presented) are at the date of the relevant document, based on a lump sum investment, using net asset value (NAV) to NAV prices with income distributions reinvested on the ex-dividend date. Inflation figures, where presented, are lagged by one month. Cash figures, where presented, are Short-term Fixed Interest Composite Index returns (StFI). All figures quoted in are in rand terms.

CISs are generally medium- to long-term investments. The value of participatory interests (units) may go down as well as up and past returns are not necessarily a guide to future performance. CISs are traded at ruling prices and can engage in borrowing and securities lending. The CIS may borrow up to 10% of the market value of the investment fund to bridge insufficient liquidity. Different classes of units apply to investment funds, which are subject to different fees and charges. A schedule of fees and charges and maximum commissions is available on request from Curate or the management company.
